DRAGON® NATURALLYSPEAKING®

CONNECTIONS PARTNER PROGRAM GUIDE

TABLE OF CONTENTS

1. INTRODUCTION

Dragon® NaturallySpeaking®, the world's best-selling speech recognition software, is being used by thousands of leading corporate, legal, government, education, social services, and insurance organizations throughout the world to speed document creation, streamline data collection, automate repetitive PC tasks, and empower disabled workers. Delivering exceptionally fast response times and up to 99% recognition accuracy, Dragon is helping users get more done in less time by simply talking to their PCs. With over 3 million copies sold and more than 175 awards for accuracy and ease of use, it's no wonder that Dragon is the undisputed market leader in speech recognition software for the PC.

Dragon NaturallySpeaking offers virtually limitless opportunities for transforming personal and business productivity. To capitalize on these opportunities, Nuance is committed to building a thriving VAR network that strengthens our market leadership, extends our product reach, and fuels continued growth. That's what the Dragon NaturallySpeaking Connections Partner Program is all about. We are looking to establish long-term, mutually beneficial relationships with qualified partner organizations that can provide valuable customization, consulting, support or training services for Dragon NaturallySpeaking products in the following vertical markets:

- **Legal**
- **Education**
- **Insurance**
- **Government**
- **Social Services**
- **Public Safety**

In addition, we are seeking partners who can sell Dragon and related services into target markets like Field Reporting and Accessibility that span a broad spectrum of industries.

The Dragon NaturallySpeaking Connections Partner Program is designed to offer the appropriate level of collaboration and support required to ensure mutual success. Our multi-tiered program provides the comprehensive product training and valuable sales and marketing resources you need to help customers get the most from Dragon NaturallySpeaking. What's more, the program offers attractive incentives for building a financially rewarding business relationship.

THE DRAGON NATURALLYSPEAKING CONNECTIONS PARTNER PROGRAM IS DESIGNED TO HELP YOU:

- **Increase your revenue and profits**
- **Differentiate your products and services within your target market(s)**
- **Provide a relationship framework that simplifies business interactions and rewards success**

---

2.   A PROFITABLE PARTNERSHIP

Dragon NaturallySpeaking Connections Partners are organizations that provide expert services, such as sales support, customization, training, consulting and technical support, to help customers leverage their Dragon solution for optimal results. Partner services empower customers to realize the full potential of Dragon — often in conjunction with other software and/or hardware products — for meeting business goals and maximizing return on investment.

The Dragon NaturallySpeaking Connections Partner Program is designed to provide you with all the resources and support you need to reach your sales quotas. When you join the program, Nuance will make you aware of all your support options to put you on the fast track to success. Depending on your partnership level, you will:

- Receive preferred pricing
- Gain access to a broad spectrum of sales and marketing tools through the online Partner Portal
- Participate in joint marketing planning and programs
- Obtain personal assistance from assigned Nuance sales, marketing and technical resources or benefit from a combination of self-service and live technical support

What's more, partners who integrate Dragon NaturallySpeaking into their solutions are eligible to receive discounted pricing on SDK support contracts.

2.1   PARTNERSHIP LEVELS

The Dragon NaturallySpeaking Connections Partners program offers four levels of engagement:

Vertical Solution Partner — This invitation-only partnership is available to select companies that can demonstrate specialized expertise and proven success in specific verticals — Legal, Education, Social Services, Accessbility, Government (such as Law Enforcement) and other markets with widespread field reporting requirements — where Dragon NaturallySpeaking can add significant value. Preliminary screening by Nuance is required before a prospective Vertical Solution Partner can initiate the certification process.

Premium Partner — The Premium level is well suited for partners who do not focus on a specific vertical market, but are committed to establishing a close working relationship with Nuance to maximize sales of Dragon products and related services. Nuance will collaborate with Premium Partners to manage specific sales opportunities, close deals, and ensure successful implementations.

Standard Partner — The Standard level provides many of the same benefits as the Premium level, but with more limited access to Nuance sales, marketing and technical resources.

Affiliate Partner — The Affiliate level, our most basic partnership, provides self-service access to the Partner Portal and the Dragon Technical Knowledge Base to help partners independently drive sales and support customers.

2.2   BENEFITS BY PARTNERSHIP LEVEL

Benefits	Vertical Solution Partner (Invitation Only)	Premium	Standard	Affiliate
SALES				
OLP/SLP Pricing Programs – a volume purchasing program through which end-users earn points for future discounts on products and support. (Levels are reviewed bi-annually.)	x	x	x

Access to Beta Programs	x	x	x	

3. THE CERTIFICATION PROCESS

3.1 INITIAL CERTIFICATION

The first step toward becoming a certified Dragon NaturallySpeaking Connections Partner is to complete and submit the online application available at **http//partner.nuance.com/register**. The Nuance Partner Program Manager and Sales team will review the information in your application and may contact you with additional questions regarding your business. Approval is based on several factors including:

- Business model
- Customer size
- Market focus
- Experience level

You will typically receive a response regarding your application approval within 7-10 business days. If your application is approved, you will be required to sign the Dragon NaturallySpeaking Connections Partner Program Agreement and purchase your Starter Kit. Finally, for new VARs, you will need to attend partner training and pass an online certification exam.

Certification usually takes 30-45 days and Dragon will help move you through the process as quickly as possible. It is your responsibility to complete and return all forms, complete web-based training and pass the certification exam. Training for brand-new partners is offered monthly. Once you have successfully completed all requirements, Nuance will do everything possible to process your certification in a timely manner to set our partnership in motion.

3.2 CERTIFICATION CONTINGENCIES

Please note that your continued certification is contingent upon meeting your annual purchase quota. Nuance monitors sales and conducts quarterly reviews to help keep partners on track. Vertical Solution and Premium Connections Partners work closely with the Nuance Sales team to develop and execute quarterly sales and marketing plans designed to help you meet program revenue requirements.

3.3 RECERTIFICATION

Recertification is required with each new release of Dragon NaturallySpeaking to ensure that all Connections Partners are prepared to use and teach the latest version and have all the resources they need to upgrade their customer base. Nuance will notify partners in advance of upcoming releases and the need to recertify. The recertification process consists of the following steps:

- Participation in recertification training (live and online sessions available)
- Successful completion of an online recertification exam
- Evaluation of partner level status to ensure purchase quotas are met
- Review of business goals and plans for the upcoming year
- Payment of recertification fee ($250), if applicable

4. DRAGON NATURALLYSPEAKING: THE SPEECH RECOGNITION SOFTWARE OF CHOICE

While there are many speech recognition products available in the market today, none comes close to Dragon Naturally-Speaking in terms of accuracy, performance, or range of functionality. Dragon learns to recognize a user's voice instantly and delivers better recognition results the more it's used. Plus, it works with most popular desktop applications, letting users accomplish a wide range of PC tasks more quickly by speaking instead of typing.

What can users do with Dragon? Create and edit documents or emails. Fill out forms. Open and close applications, menus, and dialog boxes. Control the mouse and desktop. Transcribe from a digital recorder. Create voice commands to quickly insert blocks of texts or images, or to automate even complex sequences of actions. Launch searches at any time by voice. With Dragon, users can search for keywords within files, documents, and browsing history indexed on their computer, and find Web information like maps, news, images, videos, products, and more with unprecedented speed and ease. The possibilities are endless.

There's good reason why Dragon is the world's best-selling speech recognition software. Consider these important advantages:

- **Three Times Faster than Typing** – Most people speak over 120 words per minute, but type less than 40 words per minute. That means you can create documents and emails about three times faster with Dragon NaturallySpeaking.

- **Up to 99% Accurate** – Dragon recognizes the user's voice instantly for excellent recognition results right out of the gate. It never makes a spelling mistake and actually gets smarter the more you use it. You can even customize the vocabulary with unique terminology, acronyms or proper names and delete vocabulary entries like alternate spellings that could cause acoustic ambiguity.

- **Easy to Use** – Dragon NaturallySpeaking installs quickly and requires no special script reading. On-screen help and tutorials turn novices into experts in no time.

- **Use with Many Windows Programs** – Use your voice to dictate, edit and control applications such as Microsoft Word, Microsoft Outlook Express, Microsoft Excel, Microsoft Internet Explorer, Mozilla Firefox, and AOL.

- **Search the Web and Your Computer with Dragon Voice Shortcuts** – Use Dragon Voice Shortcuts to quickly search for information on the Web or on your own computer. Need to find some information on the Web? Just say "Search the Web for global warming articles", "Search Wikipedia for George Washington Carver", or "Search shops for Batman comic books." Searching the Web or your computer has never been faster — or easier.

- **Available in Many Languages** – Dragon is available in several languages, including English, Dutch, Spanish, French, German and Italian. Advanced acoustic models and powerful adaptation techniques provide superior coverage of non-native and regional accents, enabling everyone to get better recognition results — from the very first use.

4.1 COMPELLING BUSINESS BENEFITS FOR YOUR CUSTOMERS

By integrating Dragon into their current workflow, your customers can speed document creation, eliminate transcription bottlenecks, automate routine tasks, improve accessibility for the physically disabled, and protect employees from repeti-

tive stress injuries. What's the pay-off? Your customers will realize dramatic productivity gains and cost savings that add up to bottom-line results.

Consider these compelling business benefits:

Speed document creation and form filling: Because most people speak much faster than they can type, Dragon NaturallySpeaking enables users to enter text and data in record time. Numbers Mode, Spell Mode, and other recognition modes make inputting information faster and easier than ever before.

Standardize spellings as well as reporting and documentation processes: With Dragon, your customers can implement standardized formats (for spellings, abbreviations, etc.) and customized templates and forms that can be completed quickly and easily — all by voice. These formats and templates help enforce greater data consistency across the organization.

Automate routine tasks: Built-in voice shortcuts allow your customers to search for information on the Web or their own computers with a single voice command. Or your customers can customize commands to automate repetitive tasks — such as creating and sending emails or filling out forms — that typically involve multiple keystrokes or mouse clicks. By completing frequent tasks in seconds rather than minutes, your customers can realize significant productivity gains over time.

Free up staff time: Dragon streamlines time-consuming administrative tasks, freeing employees to focus on more critical initiatives that impact the bottom line.

Improve productivity on the go: Keep employees productive no matter where their jobs take them. Workers can dictate into any Nuance-certified digital recorder for automatic transcription once the recorder is connected to a PC. Dragon NaturallySpeaking can also be used with Nuance-approved Bluetooth headsets and Tablet PC systems for optimal flexibility and convenience.

Enable hands-free PC use for improved accessibility: Dragon enables users to work virtually hands free when creating documents, accessing data, or navigating their desktop. Speech recognition has helped people with disabilities — ranging from paralysis to repetitive stress injuries — that make typing painful or even impossible. And because Dragon is Section 508 certified, it can help organizations meet government-mandated accessibility requirements.

5.   FOR MORE INFORMATION
